Why It Is Important

The MobileDefender is an easy-to-use, small and light weight 3G emergency communicator. At just 2 ounces it helps your customers remain active and mobile and get the safety they need.

Alternative medical alert buttons restrict customers to their home and require that they maintain and carry many devices to get the same safety they get in a single MobileDefender. At home or on the go the 3G MobileDefender is Trusted Safety. Anytime. Anywhere.

- 90% of baby boomers want to age "in my home".
- \$19 Billion is spent a year treating the effects of injuries from seniors 65+.
- 45% of all falls occur outside of the home.
- Falls are the leading cause of fatal and non-fatal injuries to people over the age of 65.
- After an emergency, 90% of seniors who get help within 1 hour will continue independent living.

Easy to Rollout to Customers

- Integrated with leading Automation Software
 - Bold
 - Dice
